AMS Security Hardware

Secure-T Screws packaged in bulk cartons

The AMS Security System affixes wood and metal frames to walls with this special set of hardware. When all hardware is engaged, frames are not easily removed from walls without the use of an AMS Secure-T Wrench.

To secure a frame, use 2 Mounting Brackets on the upper side of the frame and 1 Secure-T Screw on the lower side of the frame. For large frames, AMS recommends using 2 Secure-T Screws on the lower side of the frame. For small frames, it may be possible to simply use 2 Secure-T Screws along two sides of the frame and eliminate the Mounting Brackets.

AMS Secure-T Bits can adapt screw drivers for the installation of Secure-T Screws and help complete large jobs. (See bottom of next page for AMS Power Drill Adaptors #555-2-11 and #555-2-186.)

555-11

AMS Secure-T Screws for engagement either directly into standard #11-type (double-plate) aluminum frames or AMS #555-6 plates on wooden frames. Head size is 14mm. Use with AMS #555-3 Wall Anchors.

Code	Qty / UM	€ / Bag ^B
555-11-1H	100/bag	8,55 €
		€ / Box ^J
55511-1H10	Box with 10 bags of 100 T-screws	74,10 €
	<i>Price per bag</i>	7,41 €
